Continuation of Substance of Interview including description of the general nature of what was discussed:

Discussed was the language of claim 1 and how the recited features were shown in the Application's figures to clarify precisely what recited structural features were drawn to which shown structures.

Discussed was suggested language for an Examiner's Amendment to correct antecedent issues and to clarify the structural relationships of the recited component structures. Specifically discussed were the following: inserting "coupling device" into claim 1, line 3, immediately following the phrase --fluidic system-- to provide antecedent basis for the recitation of "coupling device" in claim 14, line 3; inserting the phrase --is complementary to and-- immediately after the phrase "external shape that" in claim 1, line 14, to clarify structural relationship issues; adding the phrase --interengaging the holding plate-- to the end of claim 1, line 19, to clarify structural relationship issues; adding the limitations of claim 5 to claim 1 to clarify structural relationship issues; removing the phrase "adapted for" from claim 2, line 2; removing the phrase "being adapted" from claim 8, line 3, since the phrase "adapted to" is not a positive recitation of structure; replacing the phrase "has an external surface" with --is the external surface of the fluidic system-- in claim 15, line 2, to remove double inclusion issues.

Applicant indicated that the noted claims could be amended by Examiner's Amendment.
